PROJECTS

BeatsByAndrey.com: Python, Django, Heroku, BS4

A web app built on a Django framework hosted on Heroku. It includes a multi-threaded web crawler combined with a Markov chain lyric generator to generate lyrical mash-ups by your favorite artists.

SurfScrape: Python, BS4

A python module that runs as a chronological background job and sends text messages alerts based on surf report data scraped from Surfline.com.

Fraquetball: Ruby on Rails

An application for scheduling squash games with fellow fraternity members. Includes a leaderboard and various other player statistics.

COD_CODE: Python, wxPython

A python application with a native GUI built for the University of Chicago Office of Undergraduate Admissions to automate their counselor staffing process.

shopkins.xyz: HTML/CSS, AngularJS, Github Pages

Personal website hosted on Github Pages.
